

JOINT SERVICE SPECIFICATION K1001

APPENDIX XVI

RADIOACTIVE MATERIALS AND VALVES
CODES OF PRACTICE AND FACTORY REGULATIONS

Codes of Practice and Factory Regulations

Valves containing radioactive materials, whether or not they are labelled as such, and irrespective of the quantity they contain, constitute sources of ionising radiation, and must therefore be dealt with according to approved practices. Such approved practices are exemplified by:-

- (i) "Code of Practice for Protection of Persons exposed to Ionising Radiations - (Ministry of Health and Medical Research Council)" - published by H.M.S.O.
- (ii) Ministry of Aviation, Ionising Radiations - Code of Practice 1962.
- (iii) "Factories (Ionising Radiations) Special Regulations" (Ministry of Labour) - published by H.M.S.O.
- (iv) "Precautions in the Use of Ionising Radiations in Industry" - published for H.M. Factory Inspectorates, Ministry of Labour and National Service, by H.M.S.O."
