

### 704A diode

This valve measures 28x6mm overall, plus leads.

This diode was used in the US Navy Mark 3 and 4 (FC and FD) fire control radars. It was used to measure the power output of the magnetron (the WE 700A/B/C/D)

Filament voltage	4.5V
Filament current	500mA
Max anode voltage	35kV
Max cathode current	10mA
