Y-1610

This valve measures 15x11mm overall.

Heater voltage	10V
Heater current	150mA
Max anode dissipation	1W
Max frequency	7500MHz
Typical output @ 1200MHz CW	300mW

Connections: The end plate is the anode, large ring is grid, small ring cathode, and pins are the heater.

Donated by Bill Wagner - data supplied by John Kaesehagen.
